

## About

With the continuing exploitation of Qatar's huge gas reserves the Government is embarking on an ambitious yet achievable programme of further development.

In the past it has wisely invested in infrastructure developments that will provide real and lasting benefits to the country and its people.

This has not changed, with a booming economy, an ever increasing number of immigrant workers are bolstering the population, generating the immediate need for housing, modern utilities, retail outlets, industrial and commercial business estates, education and health care facilities. The Government is creating new communities and towns throughout the State as well as expanding Doha and the other main centres.

All these developments require new road networks, utilities and amenities. Living standards have also improved substantially, and massive investment in modern sports and leisure facilities. retail malls and luxury hotels have transformed the city skyline.

Teyseer Contracting Company is taking full advantage of this prosperity by operating as an ever growing and highly versatile contracting company. To reinforce its philosophy of quality and professionalism it now offers its clients the additional peace of mind of being certified as ISO 9000 compliant.

This is the background in which Teyseer Contracting has made and continues to make its own contribution. As a Grade A classified Civil Contractor, its experience encompasses building and building maintenance, road works, water storage and distribution, sewage and drainage works and electro-mechanical installations for the petrochemical, oil and gas sectors.

To service its major groundwork projects it operates two asphalt plants and two stone crushing plants.
